(54) Title: NODE PLACEMENT METHOD WITHIN A WIRELESS NETWORK, SUCH AS A WIRELESS LOCAL AREA NET-
WORK

(57) Abstract: The disclosure includes a method of and associated system for placing nodes (104-109) in a wireless local area
network (WLAN). The method includes receiving user-specified parameters regarding the network. The parameters can include a
layout of a building or other space, and requirements for the WLAN. An algorithm then employs these parameters to automatically
create an optimized layout of multiple wireless access points (104-109) for the WLAN. The method can display the layout and
provide various types of information to the user.
